SEVENTY-FIVE SENIORS TO RECEIVE THEIR DOCTOR OF OSTEOPATHY

Honorary Degrees to Be Announced

The forty-third annual graduation exercises of the Philadelphia College of Osteopathy will be held on Saturday, June 3, the day after the seniors receiving their Doctor of Osteopathy degree in addition to the usual number of the Class of 1933.

Attorney General William J. Donovan, A. M., M. D., Litt. D., professor of surgery and one of the faculty of the College of Osteopathy at Philadelphia, will be the principal speaker for the graduation exercises.

The College of Osteopathy is the only institution of its kind in Pennsylvania, and it is one of the few in the United States to have a faculty of men who are both physicians and osteopaths.

Mr. Donovan will speak on the importance of osteopathy and its place in the medical profession.

ALUMNI BANQUET JUNE 3

The Alumni Association of the Philadelphia College of Osteopathy will hold its annual banquet on Saturday, June 3, at 7:00 p.m., in the banquet room of the Benjamin Franklin Hotel, Broad and Market streets.

The banquet is open to all alumni and friends of the College.

Local Physicians to Attend Sessions

C. Hadden Soden in Charge of Technical Section

A large number of students and local physicians are expected to attend the annual meeting of the Pennsylvania Osteopathic Association to be held in Philadelphia, Pa., June 27 to 29.

The meeting is expected to be the largest ever held in the state, and it will include a scientific exhibit of apparatus and instruments.

Dr. Edward H. Lloyd, president of the College, announced that the scientific exhibit will be held in the banquet room of the Benjamin Franklin Hotel.

Mr. Lloyd said: "We are grateful to the Philadelphia Osteopathic Association for providing us with a very fine exhibit hall in the Benjamin Franklin Hotel."
Osteopathic Digest

RESEARCH

With the adoption and installation of the Standard Classified Nomenclature, we shall be able to carry on a more systematic and accurate statistical work and to make an analysis of the statistics in a basis for clinical teaching which must parallel the classifications used in compiling medical statistics. This basis for classifying diseases is most important and will be of great value in the statistics which are understandable to medical as well as to osteopathic readers.

The need has long existed for well planned, comprehensive, and continuous statistical studies to substantiate the didactic material offered by our Dear. Dr. Edgar O. Holden, when he says, in speaking of cases in

"During the calendar year, 1933, 1919 bed patients were treated in the Osteopathic Hospital of Philadelphia for a total of 20,209 patient days. Of this total of 20,209 patient days, 1,063 were offered in an extensive field of operation, we are led to ask the introduction of the various cases to osteopathic authors of the health field from this particular field of endeavor. Counting a multitude of benefits to patients and conceding satisfaction to the medical and general public, what findings, teachings or discussions may be offered toward the advancement of the profession or to the intellectual interest of its constituency. Some program of postgraduate, studied effort through this eventual period might have permitted deduced and sensible expression of some meaning.

It is with the intent of initiating and carrying forward such a program that our research activities include careful classification according to the standard classification systems, and to follow each step in the tabulation and analysis. At present the system has been adopted and some twelve hundred cases from the General Clinic are already in the research work which may be started. With extension of the same system of classification into the hospital we have the means of covering all fields of disease, both acute and chronic. Then may we hope to achieve a still higher and more refined reliability in such matters as lesion incidence in various diseases, their location, and the structural and mechanical changes which occur during treatment.

AN ATTRACTIVE OFFERING

The Post-Graduate Course Committee has arranged a comprehensive, practical program for the graduate who attends the 1934 sessions from May through August. Among the features to be offered this year will be six complete systems of anatomical and topical moving pictures. Each of these moving pictures will be limited to one class on any given afternoon. Practical demonstrations in Osteopathic Technique and discussions of the new standard nomenclature advocated by the American College of Osteopathy will be given daily. The class will be divided into small groups, each under the supervision of an experienced demonstrator in order to accommodate all individual interests.

The facilities of the large Osteopathic Clinic of the college will not only offer interesting clinical experiences to post-graduate and pre-graduate members of the Graduate Faculty.

In addition to the symposium presentations, papers will be rendered, during the morning sessions, by well qualified instructors upon diverse subjects and to better knowledge of radiology and physical diagnosis. The facilities of the Osteopathic Hospital of Philadelphia will be open to all the Osteopathic Clinic of the college will not only offer interesting clinical experiences to post-graduate and pre-graduate students.

The committee will be encouraged to attend the busy clinics in the Dispensary each afternoon which may be attended by any osteopathic medical student. The classes will be held in the hospital receiving ward.

In addition to the clinical sessions in the amphitheater, the Obstetrical Institute takes a limited number of attenders to attend the neighboring hospital, the home of the Bayne Welfare Association of Philadelphia.

A trip to the Philadelphia Hospital for Contagious Diseases, and through its wards, and one to the Norristown State Hospital, Norristown, Pa., from where there are interesting opportunities for study.

Evening sessions, devoted to educational moving pictures, osteopathy, and the program for the day and for the following day are announced on Saturday. A scientific exhibit consisting of charts, radiographs, and pathological specimens will be displayed in the College Auditorium, during the evenings.

The committee is arranging for a dinner to be held on each day of the two weeks for each student, to be held in the homes of local members.

Women's Auxiliary

HOLD LUNCHEON

Active Program Planned for Spring

The Women's Auxiliary of the Osteopathic Hospital of Philadelphia held their annual luncheon and discussion of the hospital's work, on Monday, April 23, at 11:30 a.m. in Memorial Hall. The program included an installation of officers and a report of the activities of the auxiliary for the past year. The luncheon was followed by an open discussion on the hospital's work, with special emphasis on the rehabilitation of patients. The auxiliary then adjourned to a committee meeting.

The auxiliary's program for the spring included a series of lectures, social events, and fund-raising activities. The lectures were designed to educate the public about the benefits of osteopathic care and to encourage participation in the auxiliary's activities. Social events included a tea party, a bridge tournament, and a dance. The auxiliary also planned a silent auction and a benefit concert to raise funds for the hospital.

The auxiliary's activities were supported by the auxiliary's board of directors and by the hospital's administration. The board of directors included representatives from various professions, including doctors, nurses, and lawyers. The hospital's administration was involved in providing resources and support for the auxiliary's activities.

The auxiliary's program for the spring was well received by the public and by the hospital's administration. The auxiliary's efforts were recognized by the hospital's administration, which praised the auxiliary's dedication and hard work. The auxiliary's success was attributed to the participation of its members, who were committed to making a difference in the lives of patients and in the hospital's community.

Charity Ball at the Philadelphia Osteopathic Hospital

The Osteopathic Hospital of Philadelphia is inviting all of its patients, friends, and visitors to attend its annual Charity Ball. The event will be held on May 19, and all proceeds will go towards supporting the hospital's mission of providing quality care to all patients. This year, the ball is expected to feature live entertainment, delicious food, and an auction of unique items. Don't miss out on this opportunity to support a cause that is truly making a difference in our community.

Dr. O. J. Sinders’ Response on Founders’ Day

Dr. O. J. Sinders, President of the Osteopathic Medical Association, delivered a powerful speech on Founders’ Day. He emphasized the importance of the osteopathic philosophy and the need for continued innovation in the field of medicine. Dr. Sinders highlighted the contributions of our forefathers and called upon all members of the profession to carry on their legacy. He ended his speech with a strong encouragement to all osteopathic physicians to work together to ensure the future of our profession.

Picture Now in College Library

A new addition to the college library, "The Standard Nomenclature of Diseases," has been received. This valuable resource is an essential tool for students and residents alike. It is hoped that this addition will further enhance the educational experience at the Osteopathic Hospital.

College Catalogues are Ready for Prospective Students

The college’s new catalogues are now available for prospective students. These catalogues provide comprehensive information about the programs offered at the Osteopathic Hospital, including course descriptions, requirements, and application procedures. They are a valuable resource for anyone considering enrolling in the college’s programs.
