Digest of the Philadelphia College of Osteopathic Medicine (Spring 1981)

Philadelphia College of Osteopathic Medicine
LET'S TALK ABOUT THE DIGEST

The Digest of Philadelphia College of Osteopathic Medicine is a quarterly magazine of general information about The Osteopathic Medical Center of Philadelphia. Its objective is to inform alumni, students, and employees of the events, facilities, personnel and developments at the medical center. The issues are labeled Winter, Summer, Fall and Spring and cover the events of each season.

The Digest is a cooperative effort of the Department of Corporate Communications. It is written, edited and photographed by members of the department. And when time allows, typography, graphic design and layout are completed in the department.

The editors welcome the opinions and criticism of the readers. If there are areas you would like to see covered, please let us know. We always welcome news and photographs of alumni, faculty and students.

Policy of Non-Discrimination

Philadelphia College of Osteopathic Medicine does not discriminate on the basis of age, race, color, national and ethnic origins, sex, sexual preference, religion, or handicap in the administration of its employment and educational policies, student admissions policies, scholarship and loan programs, patient admissions and services and other programs administered by the College, Hospital, Health Care Centers and School of Allied Health.

Harvey G. Tomlinson, director of personnel, has been designated coordinator of PCOM's non-discrimination program. Inquiries regarding compliance with the program may be sent to Mr. Tomlinson at PCOM's personnel office. Inquiries regarding compliance with the sex discrimination provisions of Title IX of the Education Amendments of 1972 may be directed to Mr. Tomlinson or to the Director of the Office of Civil Rights, Department of Health, Education and Welfare, Washington, D.C.
4190 LIVING ALUMNI OF
PHILADELPHIA COLLEGE OF
OSTEOPATHIC MEDICINE —

Believe it or not, the address of our new facility at City Avenue is also the count of alumni as of May, 1981! If each of our 4190 alumni were to pledge $1,000 over a three year period, our Capital Gift Campaign goal would be assured.

As you will read in the article on the Capital Gift Campaign, a number of our loyal graduates have already pledged and made contributions. I cannot stress too strongly, however, our need for the support of all our alumni. Won't you consider being one of the 4190 alumni who did contribute to the Capital Gift Campaign?

Very truly yours,

Thomas M. Rowland, Jr.
President
Report of the Capital Campaign

A report on the first eight months of the Corporation’s Capital Gift Campaign indicates that the campaign is more than halfway to its goal of $4 million. According to Hale T. Peffall, Jr., executive director of alumni relations, who administers the campaign, total campaign pledges from October 1, 1980, to May 31, 1981, are $816,653.40. In addition, the campaign donations include $800,000 from three College Growth Funds and a $1,000,000 grant from the Pew Foundation. The campaign funds now total $2,616,653.40.

“We are pleased that we are more than halfway to our goal before the first year is over,” said Peffall. “The average pledge is really good — over $1,000 if we include the individual pledges of $4,190; and even if we exclude the $4,190 pledges, the average gift is $936.07. That is well over the average gift at professional schools that have larger numbers of alumni.”

The Capital Gift Campaign was launched last year to finance renovations in Evans Hall and in the Medical Office Building at 4190 City Avenue. A plaque in the lobby of the building will be inscribed with the name of each person making a three-year commitment of $4,190. There is also a memorials program to recognize individual gifts of $10,000 or more. Persons interested in a major gift of this kind may contact Dr. Thomas M. Rowland, Jr., or Hale T. Peffall, Jr.

The Medical Office Building at 4190 City Avenue was dedicated in January of 1981. Its use has brought an increase of patients to the physicians’ offices and to the hospital and has provided a much needed 100,000 square feet of space for educational and student-related areas. A pictorial tour of the building will be found on page 12 of this issue.

Those interested will find a pledge envelope attached to the President’s Page. Remember — “The future of Philadelphia College of Osteopathic Medicine is in our hands — and yours.”

Spring 1981
The Neurosensory Diagnostic Center

10 Specialists Use a Team Approach to Neurosensory Problems

For the last five years, members of the neurosensory diagnostic center have functioned quietly, yet effectively, on the lower level of Evans Hall. They diagnose learning disabilities, developmental disabilities and medical problems in children, adolescents and adults.

Because some neurosensory problems involve more than one area of the nervous system, the center includes specialists from 10 departments and disciplines: child and adult neurologists, psychologist, psychiatrist, neuropsychiologist, ophthalmologist, otorhinolaryngologist (ENT), audiologist, speech and language pathologist, educational specialist and general practitioner. Using a team approach, they diagnose problems of the nervous system and its special senses. And when needed, they use the resources of PCOM's Hospital. The OMCP's neurosensory diagnostic center was one of the first of its kind in the Philadelphia area, and even though there are similar units in the area, none is as extensive or provides services so conveniently.

Patients go to one location only — not to specialists in separate offices throughout the area. And appointments are scheduled by the neurosensory coordinator — another convenience for patients. Each appointment with a specialist can take from one to three hours, so a work-up is generally spread over a period of several weeks.

Members of the neurosensory center handle a range of cases from the simple to the complex. Depending upon a preliminary diagnosis of a case, the work-up can be complete with every specialist involved, or partial with only a few specialists.

George H. Guest, DO, FACN, directs the neurosensory diagnostic center as well as the department of psychiatry. Says Dr. Guest, "We handle the very complex diagnoses — where the problem may be biochemical, genealogical or complicated learning disabilities — to the relatively simple to diagnose — such as overlooked cases of deafness or visual problems.

Whether the problems are simple or complex, patients must be referred to the center by a physician, teacher or guidance counselor, public or private schools, in the case of a child or adolescent, or by a physician, in the case of an adult.

Some referred patients come to the center with incorrect diagnoses. This was the case with a seven-year-old boy from South Jersey whose teachers thought he was retarded. He did not pay attention in school and tested below his age level. After a routine hearing test during a neurosensory work-up, he was found to have a hearing problem and was not at all retarded. When he was given a hearing aid at the center, he spent 20 minutes flushing the toilet, excited by a sound he had never heard — rushing water. Because he could hear with the aid, he caught up to his classmates' level within eight months.

Some cases are not that simple to diagnose. For example, Beth, a 21-year-old woman with severe headaches and vision loss presented...
a diagnostic puzzle to the center for two reasons. First, results of her tests had been inconclusive as to whether her problem was related to migraines. Second, she was adopted, so there was no way to tell if her problem was inherited.

At the neurosensory diagnostic center further tests were ordered: a sleeping EEG measuring the brain at rest showed an imperfect pattern for Beth; a functional neurological response — FNR — measuring the brain at work showed delayed or abnormal responses; and doppler studies measuring the flow of blood through the arteries of her brain were normal.

Her problem was finally diagnosed as Brickerstaff's syndrome — an uncommon form of basilar artery migraine. Brickerstaff's syndrome generally follows a head or neck injury such as whiplash, which Beth had sustained in a car accident.

She still gets her headaches, but can control the pain. Interestingly, medication has been less effective than manipulative treatment to the upper cervical area. Beth's osteopathic physician has even taught her how to manipulate her head and neck for the relief of pain.

(please turn to page 6)
Beth is not a typical neurosensory center patient. Most patients are children — some 70% — and most of them have learning disabilities. According to the center's coordinator Danielle Cavanaugh, diagnostic tests have indicated learning disabilities in over two hundred children in the last four years.

Diagnostic tests are divided into two, broad categories: learning or developmental disabilities and medical problems. Most involve the first category. Tests may include a complete neurological history and physical by the pediatric neurologist; complete visual exam by the ophthalmologist; ear, nose and throat exam by the otorhinolaryngologist; and auditory system check by the audiologist; a speech and language evaluation by the speech pathologist; measurement of the workings of the brain by the neurophysiologist; academic evaluation of reading, spelling and math skills of school children or readiness to learn in the pre-school children by the educational specialist; evaluation of intellectual potential and behavior by the psychologist.

After completion of the indicated tests, members of the neurosensory diagnostic team meet to discuss the results, to determine the nature of the problem and recommend therapy and remediation.

Center personnel emphasize the importance of detecting learning disabilities at an early age if therapy is to have any effect. Theodore P. Mauer, DO, chairman of the department of ent, and member of the neurosensory diagnostic center, sums it up: "The earlier you get a child with a learning disability, the easier it is to prescribe some kind of treatment or recommend special education aimed at his strength."
Faculty Notes

Theodore P. Mauer, DO, professor and chairman of ent, chaired a committee and workshop for college instructors in otorhinolaryngology at the clinical assembly of the Osteopathic College of Ophthalmology and Otorhinolaryngology in Kansas City in April. Last December, Dr. Mauer received the Legion of Honor award from the Chapel of the Four Chaplains in Philadelphia. The award for community service was also presented to Louis L. Martini, DO, of the hospital professional staff.

J. Brendan Wynne, DO, chairman of the division of orthopedic surgery, and Spencer Bradford, DO, chairman of the division of special and continuing education, spoke to medical students of Jefferson Medical College in April. The subject was the basic concepts of the osteopathic philosophy.

John Becher, DO, chairman of the department of emergency medicine, chaired an intensive one-week course in advanced emergency medicine in April. More than 50 emergency medicine physicians participated. Among the panel members was J. Sydney Hoffman, JD, of the superior court of Pennsylvania and chairman of PCOM's board of trustees, who spoke on medical-legal aspects of emergency room practice.

J. Vincent Huffnagle, DO, chairman of the department of general practice, appeared as a guest on TV — 3's People Are Talking program in April.

Dr. Thomas M. Rowland, Jr., president, delivered the keynote address in Erie, Pa. as Erie Osteopathic Hospital held a namechange ceremony in May. The hospital's new name is Millcreek Community Hospital. The college has affiliation agreements with MCH for the clinical education of PCOM students.

Robert L. Meals, DO, FAOCR, professor and chairman of the department of radiology, received the distinguished alumnus award from Lebanon Valley College. He was honored for his dedication and service to man through research and education during Alumni Day ceremonies on the LVC campus in May.

Michael Kirschbaum, DO, chairman of the division of cardiology, spoke on “Digitalis Intoxication and Drug Interactions” at EROC in April.

Nicholas S. Nicholas, DO, FAAO, professor and chairman of opp, presented a “Symposium on Sports Medicine” at POMA’s 73rd clinical assembly at Host Farm Resort, Lancaster in April. The assembly also featured Emanuel Fliegelman,

D.O., FACOOG, professor of ob/gyn, presenting a “Symposium on Sexology” and Sherman N. Leis, DO, clinical assistant professor of surgery, on “Cosmetic Plastic Surgery.” Dr. Fliegelman has been appointed to the Gynecology Cancer Committee of the American Cancer Society, Philadelphia Division. Dr. Rowland updated college developments for a large group of alumni at the PCOM Alumni luncheon.
Minority Program

"Minority Opportunities in Osteopathic Medicine" was the subject of an all-day conference in April. Sponsored by the office of admissions and student affairs, the program was designed to provide students with information on the profession, on academic preparation and admission requirements. It included an explanation of osteopathic medicine by Alexander Nicholas, DO, department of opp, an address by Carol Fox, director of admissions, and a panel discussion led by Robert Cuzzolino, assistant director. The panel's faculty included a student, an intern and members of the faculty and professional staff.

William Shiels '83, member of student council, was instrumental in starting a chapter of the Association of Military Osteopathic Physicians and Surgeons (AMOPS) at PCOM. The new chapter received 30 responses to the initial request for membership. Since 25% of all osteopathic college students are in military or public health service, AMOPS provides information on the unique issues surrounding government medicine. The youngest divisional society with worldwide membership, AMOPS is the 8th largest and still growing. Interested students may contact Kathy Stroke '84, recording secretary of student council, for information on membership.

Charles Dear, media specialist in the department of corporate communications, spoke at the Media Directors Institute during the Health Education Media Association's national convention in Philadelphia in April. He served as panel member presenting instructional media in health care facilities.
Basketball Marathon

PCOM students bounced basketballs and shot hoops for 36 straight hours the weekend of April 24 to net over $1000 for multiple sclerosis patients. Sponsored by student council, the marathon helped to fund services for the 2800 MS patients in the Greater Delaware Valley and to aid in MS research. A local TV station covered some of the 'round-the-clock play during the cold, windy weekend. Teams included students, members of the departments of housekeeping and security, and representatives from Temple Dental School, St. Joseph’s University, Holy Family College and Jefferson Medical College.

NEW DEPARTMENT PROVIDES CORPORATE COMMUNICATIONS

In April the departments of public relations and educational communications merged to create the department of corporate communications. The newly developed department will serve all areas of the corporation. It will encompass all the functions and services formerly divided between the two: public relations, marketing, media and community relations; publications; graphic and audiovisual arts and photography.

Directed by Maggie Ferguson with Jim Murphy as assistant director, the new department reports to the president.

Ms. Ferguson
Mr. Murphy
News from the Hospital and Health Care Centers

New officers of the hospital professional staff, elected in the spring, are: chairman, William Dickerson, DO, chairman of the department of internal medicine; vice chairman, J. Peter Tilley, DO, professor of radiology; secretary, Richard M. Papa, DO, director of medical education; treasurer, Samuel L. Caruso, DO, professional director.

Jerry Hickman, administrator of the health care centers, participated in a legislative reception sponsored by the West Philadelphia Community Mental Health Consortium. Discussions with councilmanic and state representatives aired the concerns of both patients and providers of mental health services in the area. Mr. Hickman is a member of the board of directors of the consortium.

FREE BLOOD PRESSURE SCREENINGS AND HEARING TESTS

Hospital interns administered 260 free blood pressure screenings in the lobby of 4190 to celebrate National Hospital Week. Also, members of the ent department conducted 47 hearing tests in the same area, since May is also Speech and Hearing month.

Former chairmen of the hospital professional staff were honored for their service at the professional staff dinner dance in May. Above William Dickerson, DO, recently elected chairman of the staff, presents a gift of appreciation to Albert D’Alonzo, DO. At center is Nicholas Pedano, DO, outgoing chairman. Mrs. Pedano is at right.

Members of the hospital Women’s Guild celebrated Doctors Day in March with tokens of appreciation for the physicians. Above, Mrs. Carol Caruso pins a carnation on Samuel Caruso, DO, professional director.
Students from the Lower Merion High School special education program were honored at a luncheon in April for their volunteer services to the OMCP. (L-r) Aliceann Heldring, who worked in the print shop; Karen Toff, in the pharmacy; Robert Ruoff, principal of LM High School; Ellen Bradford, print shop; Melissa Carr, CSR; Martha Mewbourne, director of volunteers; Margie Brodsky, print shop; Laurie Brodsky, dietary, and Dr. Thomas M. Rowland, Jr., president.

Dr. Thomas M. Rowland, Jr., congratulates Virginia Bauer, (center) for 1,000 hours of volunteer service to the hospital.
Tour of 4190

For those who have not had the opportunity to view the interior of the corporation’s new building at 4190 City Avenue, here is a brief view of the floors:

BASEMENT: This area includes the mail room, print shop, xerox machine and microfilm storage.

LOBBY FLOOR: The security desk and an outpatient pharmacy are located on the lobby floor.

FIRST FLOOR: The lecture hall is equipped with 250 fixed seats, with an area for another 250 seats when needed. The rear of the hall can be closed off for private conference rooms. Student facilities include carrels, study rooms and a lounge. Along the City Avenue frontage are all the offices of the department of financial affairs, including general accounting, accounts payable, payroll and billing areas. The purchasing department and the office of the administrator of the health care centers complete the floor.

SECOND FLOOR: The department of osteopathic principles and practice includes a teaching laboratory and offices for the department’s faculty. The school of allied health is also located here, as is the division of special and continuing education, the temporomandibular orthopedic center and soon-to-be opened dental offices.

THIRD FLOOR is unfinished.

FOURTH FLOOR: The entire floor is arranged into facilities for 60 physicians’ offices, each with its own waiting area. The offices include those for specialists in allergy and immunology (adult and children’s); cardiology; dermatology; ear, nose and throat; emergency medicine; family practice; gastroenterology; general surgery; infectious diseases (adult and children’s); internal medicine; ob/gyn; ophthalmology; orthopedic surgery; pediatrics; including pediatric neurology and neonatology; physical medicine and rehabilitation; proctology; pulmonary medicine; trauma surgery; urologic surgery.

In addition there is a six-room ancillary x-ray area with ultra-modern equipment; a laboratory pick-up station and offices for the manager of the physician’s suites.
Tour of 4190 — continued

SECOND FLOOR

OPP laboratory

Dental program of the School of Allied Health
FOURTH FLOOR

Physicians' offices, examining rooms, consulting and conference rooms

Each physician's office has its own waiting area

Print Shop—BASEMENT
Celebrating their 45th anniversary, members of the class of 1936 are (l-r) Priscilla Moore Fassett, St. Davids, PA; Dorothy Evans Pasco, Clearwater, FL; and Dorothy Gaskill Mason, Havertown, PA.

The silver anniversary class of 1956 included: (l-r) Wanda Klinehan Shelbo, Bethlehem, PA; Lola Stone Schmidt, Deptford, NJ; Barbara Laib Goodwyn, Wilmington, DE; Margaret E. Uhler, Lancaster, PA; and Joyce Bury Slifer, Huntington Valley, PA.

Members of the class of 1941 celebrated their 40th anniversary: (l-r) Jane Waterhouse, Philadelphia; Dorothy Arbegast Coles, Pitman, NJ; Edith Miller, Warminster, PA; Ruth Herrdegan Cypherus, Cleveland, OH; Helen Byers Fish, Lancaster, PA; Georgina Griffin Wisselowski, Toms River, NJ; the late Janice Miller Thrash, Glenolden, PA; Claire Brown Eastwood, Havertown, PA; Irma Jeanette Reese, Glenolden, PA.
What's New at PCOM's Bookstore

New items on sale at the college bookstore include handsome cherrywood chairs with gold trim and the college logo. The captain's chair shown is $109 delivered anywhere in the U.S. Also available is a rocking chair at $112 and a director's chair at $45.

Maroon and gray ties in silk and polyester are $11.50 and are gift boxed. Oh, yes, the PCOM Snoopy is $8.95.

Silk hand-embroidered blazer crests are available in either maroon or gray background and cost $10.00 delivered.

Call the bookstore at (215) 581-6355

For mail orders, call or write Vincent Albano at (215) 473-4439, PCOM Bookstore, 4150-90 City Ave., Philadelphia, PA.
To: Alumni and Friends of PCOM  
From: Synapsis 1982

Please answer these questions honestly. Do you know what’s happening to PCOM? Have you seen the new look at City Avenue and Monument Road? Have you seen or contacted your colleagues lately?

Well, if the answer is NO to any of these questions, then you owe it to yourself to take advantage of this fantastic offer. You can not only help the Class of 1982, but at the same time participate in the all new Synapsis — 82, destined to become a legend in its own time.

All it takes is a few minutes of your time and a small tax-deductible contribution to place your name (and message) for all to see. Please fill out the form below and send it along with a check to the address below.

DEADLINE — January 31, 1982
Spring Sports

Fourth Championship in Six Years for Basketball Team

Due to the number of teams in the Philadelphia Professional School Basketball League, the 1980/81 season sported two divisions. The PCOM Gray team entered the B division and placed fifth. The PCOM Maroon team entered the A division and placed second. In the divisional playoffs (among the top four in each division), the PCOM Maroon team eliminated Villanova Law School and Temple Dental to win the A division championship and contend in the league championships. The maroon team proved victorious by defeating Jefferson Medical School in two straight games for the championship.

Soccer
PCOM 4 wins
2 losses — 1 tie

Rugby
A team — 2 wins, 4 losses — Placed second in St. Joseph’s University Spring Rugby Tournament

Worth Mentioning

OSTEOPATHIC CONCEPT

“...Millcreek Community Hospital is ... an osteopathic institution. The osteopathic concept is, as stated in your hospital literature, ‘something more.’ While our brethren in the allopathic profession today talk of ‘holistic medicine’ and ‘treating the whole person’ as though this were a new concept, osteopathic medicine has had this premise as the basis for its medical practice for over a century. And practice of the osteopathic concept has brought both Millcreek Community and the profession of osteopathic medicine to their present level of success.”

Dr. Thomas M. Rowland, Jr.
Name Change Ceremony of Millcreek Community Hospital

CONCERN FOR THE PATIENT

“I am sure that we physicians, if we had to spend time ... as a patient, would have to be either quite strong or desperately ill to survive.

Being horizontal when the other guy is erect is a demeaning experience, and I have seen men of substance lose all self-confidence and submit like beaten animals to the orders of ... a nurse.

The patient does have two strikes against him, compared to the ... mobile person, and everybody knows it.

It takes humans of high character or deep insight not to reap advantage consciously on unconsciously from this situation and most ... all fall short. The patient has not lost his human rights by the circumstances of illness but he tends to think he has, and it is often easier to encourage his mood than to offer support to his morale.

I think in medical schools a professor of humanity is on an equal footing with the professor of pathology.

In sorting out the combination of many complaints given us, I have had many occasions on which to think of Mark Twain’s reply to the lady who said to him, ‘Oh, Mr. Clemens, I have a headache and a toothache, can you imagine a worse combination?’ (With) no hesitation the sage replied, ‘Yes, Ma’am, Rheumatism and Saint Vitus Dance.’”

Samuel A. Hartman, M.D.
Grandfather of Stuart A. Hartman ‘82

Spring 1981
New Appointments

Leonard Rubin, Ph.D. has been appointed research associate in the department of neurology/psychiatry. He holds a bachelor of science degree from the College of the City of New York and a PhD from New York University. Dr. Rubin is a former associate professor in the department of psychiatry at the University of Pennsylvania; an adjunct professor of neurology/psychiatry at Temple University School of Medicine, and director of psychobiology in the division of pharmacology, Eastern Pennsylvania Psychiatric Institute. He is the author of 50 publications.

Lynn Braff, MEd, has been appointed educational specialist with the Neurosensory Diagnostic Center. She holds a master's degree in special education from Temple University and a BA in Sociology from Lake Forest College. Mrs. Braff is certified for special education in Pennsylvania for emotionally disturbed, mentally retarded, physically handicapped children from kindergarten to ninth grade. She also holds a New York permanent certificate for special education. Mrs. Braff comes to The OMCP from Ithaca, NY, where she was educational consultant to teachers of high risk students including the learning disabled, emotionally disturbed, and slow learners.

Walter Prozialeck, PhD, has been appointed assistant professor in the department of physiology and pharmacology. He holds a bachelor of science degree in Chemistry from Juniata College and the PhD in pharmacology from Thomas Jefferson University. Dr. Prozialeck spent two years in postdoctoral education at the Medical College of Pennsylvania on the mode of action of antipsychotic drugs.

Bruno Bromke, PhD, has been appointed instructor in the department of microbiology. He received his bachelor's degree cum laude from LaSalle College and his masters and doctorate from Hahnemann Medical College in microbiology. At Hahnemann Dr. Bromke worked on enzyme production and regulation in the organism Serratia marcescens. He spent three years in postdoctoral education at Temple University where he worked in the pulmonary department.

Judy Brown has been appointed director of hospital admissions. She comes to The OMCP from Taylor Hospital in Ridley Park, PA, and is an accredited admitting manager certified by the National Association of Hospital Admitting Managers. She is a graduate of Delaware County Community College.

Catherine Reardon has been appointed audiologist in the department of ent. She holds a master's degree in audiology from Temple University. Her experience includes industrial audiology at Triangle Publications; research for the Department of the Navy; and pediatric habilitative audiology at a school for the hearing impaired in Newark, DE.

Mickey Colflesh has been appointed audiologist in the department of ent. She holds a BS in Business Education and an MS in audiology from East Tennessee State University. She is a member of the American Speech and Hearing Association and holds a certificate of clinical competence in audiology.

Ilene Parker has been appointed speech pathologist in the department of ent. She holds a BA from Brooklyn College and an MS from Teachers College, Columbia University. She comes to OMCP from Temple University’s Woodhaven Center where she provided language services to severely and profoundly mentally retarded persons.

Ray Champagne has been appointed food service manager. He is the former assistant director of food service at Graduate Hospital and at Giuffre Medical Center. He is a graduate of Bryant College, Providence, RI, and is currently enrolled in the food service management program at Immaculata College.
This should be called Travels of an Alumni Director, because I've put a lot of miles on my luggage this Spring. Here are some of the stops:

**FOMA Convention in March**

Hollywood, Florida

Dr. Rowland held a poolside cocktail party for 150 PCOM alumni. Among the guests was Louis Lang III '68, president of FOMA and a pathologist at Sun Coast Hospital, Largo, and his wife and classmate, Marie E. Kirkland '68. During our visit, the mayor of Deerfield Beach, Jean Robb (who is married to Leo Robb '57) presented the key to the city and an honorary membership to Dr. Rowland.

**Arizona-Nevada Convention**

PCOM sponsored an exhibit booth with a pictorial history of the college and I presented an updated slide show at the alumni luncheon. Highlight of the luncheon was Dick Darby '62, regional chairman of the Capital Gifts Campaign, who spoke to the attending alumni, some 80 people.

While I was at this convention, Dr. Rowland was speaking at the alumni luncheon at the Eastern Regional Osteopathic Convention (for DO’s from New Jersey and New York) at the Concord Resort Hotel, Kiamesha Lake, NY. Many alumni board members were in attendance, including Bob Maurer, '62 president; Joe Pelletiere '48, Bob Renza '62, Mike Sutula '59, and Al Rodi '58.

**Michigan Association of Osteopathic Physicians Conference and Seminar, May 7-9**

Dearborn, Michigan

Once more I made a slide presentation at the alumni luncheon on Friday to show our Michigan alumni the latest developments at The OMCP. Before leaving Philadelphia, I had noticed that the U.S. National Rugby Championships were scheduled at Wright-Patterson Air Force Base in Dayton, Ohio, over the weekend. After playing, coaching and managing PCOM's rugby team for five years, I couldn't resist making the trip. It turned out to be a full scale rugby reunion.

**RUGBY REUNION**

Not only were high school, college and rugby side championships being played at Dayton, but also the military championship between the Air Force and Marine Corps. I found PCOM alumni wearing rugby jerseys on the playing fields in the U.S. national championships, assisting at the first aid stations and as part of the audience. Here are some alumni I met:

**Bruce Rank '78** is still playing rugby for Miami Valley RFC and is the team's leading scorer. He is entering a third year of surgical residency at Grandview Hospital in Dayton, where he was elected to his third term as president of the house staff. Not only was Bruce playing but he was helping to coordinate the tournament and manning the first aid stations with Craig Critchley '78, who recently opened a family practice office in Troy, Ohio. Craig, who also maintained his rugby affiliation with Miami Valley RFC, completed an internship and family practice residency at Grandview. Captain Tom Tylman '79 was starting lock.

Bruce Rank '78, Mark Holencik '79, H.T. Peffall, Jr., Craig Critchley '78, Martin Heine '81
RUGBY REUNION - continued

forward for the Air Force’s “Wright-Patterson Jets” who defeated the Marines for the National Military Championship. Tom also assisted at the first aid stations along with his wife, Cathy (Missory) ’80. Cathy is entering her first year of a medical residency at Grandview and Tom is in his second year of medical residency at Wright-Patterson AFB.

Among the team supporters in the stands I found Mark Holencik ’79, who is starting an orthopedic surgery residency at Grandview; and Marty Heine ’81, an intern at Allegheny General Hospital in Pittsburgh. It was good to see so many alumni still interested in rugby. All of them considered this activity a vital part of their medical school program.

For those of you who may have missed it, the Alumni Association is sponsoring an “Oriental Odyssey” right after the AOA convention. This is the first time the Association has sponsored a tour and we hope it’s a success. Please call my office for information if you did not receive the mailing. Also, mark your calendar NOW for Founders Day/Alumni Weekend — JANUARY 22, 23, 1982. Please see the inside back cover of The Digest for a complete schedule of events. And start considering YOUR CLASS REUNION. You’ll be amazed at the new look of THE OSTEOPATHIC MEDICAL CENTER OF PHILADELPHIA.

Hale T. Pefall, Jr.

1928

W. Irvin Atkinson, Millville, NJ — honored for service to the community by the Millville Hospital staff and board. Dr. Atkinson has practiced family medicine in Millville since 1928, and has served as a local school and football team physician and chief county medical examiner.

1955

David McClain, Des Moines, IA — announced with pride the graduation of his son Tim from the United States Air Force Academy in May.

1958

Edward E. James, Coraopolis Heights, PA — named “Citizen of the Year” for his continued efforts in the medical field by the West Hills Jaycees. Dr. James is chairman of the Sewickley Valley Hospital family practice department and has maintained a private practice in Coraopolis for 20 years.

David Wiley, Lancaster, PA — named district director to the Pennsylvania Division of the American Cancer Society Board of Directors.

1962

Marvin G. Soalt, Montclair, NJ — named chairman of the department of rehabilitation medicine at the Hospital Center at Orange, NJ. Dr. Soalt is a diplomate of the American Board of Physical Medicine and Rehabilitation and a fellow of the American Academy of Physical Medicine and Rehabilitation. He is also board certified in general practice by the American Osteopathic Board of General Practice.

1963

William J. King, Woodbury, NJ — spoke on the osteopathic profession at a meeting of the Eastern Regional Association of the National Medical

1966

Berel Arrow, Lancaster, PA — selected “Man of the Year” by the Temple Beth El in Lancaster.

Richard E. Colarusso, Pittston, PA — elected president of the Penn-
sylvania Osteopathic Medical Association at the organization’s 73rd annual clinical assembly in May. He also announced the opening of a new office for the general practice of medicine on South Township Boulevard, Pittston.

1970
Art Mollen, Phoenix, AZ — will author an internationally syndicated medical column on fitness and health titled “Feeling Good.” Dr. Mollen is the director of the Southwest Health Institute in Phoenix and is a lecturer on fitness and stress reduction. The column, syndicated by the Register and Tribune Syndicate of Des Moines, Iowa, will appear three times a week.

Jeffrey E. Ledis, Flint, MI — elected to fellowship in the American College of Cardiology. He is staff cardiologist at F.O.H., McLaren and Genesee Memorial Hospitals, and assistant professor of medicine, section of cardiology at Michigan State University School of Medicine.

1971
John E. Dougherty, III, Harrisburg, PA — named acting director of medical education at Community General Osteopathic Hospital.

1972
S. Howard Riker, Yardley, PA — completed four years as chief of family practice at Watson Army Hospital, Ft. Dix, NJ. He is board certified in family practice and is a fellow of the American Academy of Family Practice. He maintains a family practice in Newtown, Bucks County, and is licensed by the FAA as an aviation medical examiner.

1973
Stuart D. Levy, Germantown, PA — appointed to Friends Hospital’s senior medical staff. Dr. Levy, who maintained a general practice for four years before specializing in psychiatry, completed a three-year residency program co-sponsored by Hahnemann Medical College and Friends Hospital. He is a member of the American Psychiatric Association.

1974
Joseph T. Tretta, Fort Leonard Wood, MO — serving as chief of otolaryngology and head and neck surgery at Fort Leonard Wood Army Hospital. Dr. Tretta holds the rank of major.

Richard G. Tucker, Medford, NJ — appointed clinical assistant professor, department of ob/gyn at the College of Medicine and Dentistry of New Jersey, New Jersey School of Osteopathic Medicine. Dr. Tucker, who maintains a private practice in Mount Holly and Medford, NJ, is also senior instructor of ob/gyn at Hahnemann Medical College and Hospital.

1975
Joseph C. O’Laughlin, Mount Clemens, MI — appointed assistant clinical professor of medicine at Michigan State University College of Osteopathic Medicine. He serves as a consultant in gastroenterology to four Detroit area hospitals. Dr. O’Laughlin and his co-workers at the University of Missouri recently developed a technique to directly measure the effects of different drugs on bleeding time in the stomach. The February issue of Gastrointestinal Endoscopy published the technique.

Allen J. Zagoren, Cherry Hill, NJ — appointed director of medical education at John F. Kennedy Memorial Hospital, Cherry Hill Division.

1976
R. Michael Gallagher, Indian Mills, NJ — presented a paper on “Ergotamine Rebound” at the annual meeting of the American Association for the Study of Headache (AASH). The international assembly was held in Washington, DC in May. Dr. Gallagher conducted a controlled study on patients taking maintenance
Alumni News Briefs — continued

Ergotamine (a vasoconstrictive substance used to prevent or abort vascular headache), and demonstrated a rebound phenomenon on withdrawal, which had been only suspected previously. Dr. Gallagher is one of two osteopathic physicians who are members of the AASH.

Barry C. Holmes, Broomall, PA — certified by the American Board of Internal Medicine in September, 1980. He is practicing internal medicine in Swarthmore, PA.

1977

Robert I. Lewis, Miami, FL — presented a research paper, Asymptomatic Bacteriuria in Neurogenic Bladder Disease at the spring meeting of the American Urologic Association Southeastern section. Dr. Lewis is chief resident of the department of urology at the University of Miami School of Medicine.

Marina Vernalis, Bethesda, MD — was guest speaker at the June commencement of her alma mater, Cardinal Brennan High School, Pottsville, PA. Dr. Vernalis is a lieutenant with the Medical Corps, US Naval Reserve, in the department of internal medicine, National Naval Medical Center, Bethesda.

1978

John C. Pellosie, Jr., Niceville, FL — serves as flight surgeon in the Aerospace Medicine Department at Eglin Air Force Base, FL. He is a captain in the Medical Corps of the USAF and is flying with the 3246 Test Wing.

1979

Robert Hynick, Allentown, PA — opened a general practice in Salisbury Township, PA.

In Memoriam

Thomas H. Oxley '26, Holickong, PA, died on April 7 during a visit to Arizona. He was 86. Dr. Oxley had practiced in the Tacony section of Philadelphia since his internship. He was a veteran of World War I and a member of the Veterans of Foreign Wars. He was a faithful attendant of most of the CME programs presented at The OMCP and had served on the State Board of Osteopathic Examiners for more than 25 years. Dr. Oxley is survived by his wife Elsa and two daughters.

Albert G. Zukerman '36, Norristown, PA, died March 29 in Florida. He was 70. Dr. Zukerman was a radiologist and chief of radiology at both Parkview and Metropolitan Hospitals. He was a member of the Radiological Association of America. He is the former president of the National Medical Association. He is survived by his widow, a son, two daughters, two sisters and two grandsons.

Elmer S. Carll, a 23-year member of PCOM's board of trustees, Philadelphia banker and real estate executive, died on April 29. He was 81. Dr. Carll, who had received an honorary degree from PCOM in 1966, served as treasurer of the corporation from 1975 to 1980, as chairman of the board's budget and finance committee for 10 years, as vice chairman of the board and as a member of the pension and hospital committees.

Dr. Carll spent his career in the real estate and mortgage field. He was a former president of the Industrial Trust Company and at the time of his death was vice chairman of the Industrial Valley Title Insurance Company. He was also a director of the Germantown Insurance Company and the District Realty Title Insurance Company of Washington.

A graduate of Temple University, Dr. Carll served as chairman of Temple University Associates for seven years and had received the University's Alumni Distinguished Service Award. He had also been honored for his work on behalf of Kensignton Hospital, and the Boys Clubs of America. He was a Mason, a Shriner, a member of the Union League and the Skytop Club. He is survived by his wife Dorothy E. Brown Carll.

Colonel John Lucas, former administrator of the 48th Street Hospital of PCOM and first administrator of the college's urban health care centers, died on April 2. Colonel Lucas had been associated with PCOM for seven years, first as business manager and then as administrator of the 48th Street hospital from 1967 to 1973. After the 48th Street hospital was closed in order to consolidate all inpatient services at City Avenue, Colonel Lucas was appointed health care centers' administrator. The Colonel had retired from the U.S. Army Medical Service after 34 years of active military duty. He served in Siberia in World War I, and in the China, Burma, India Theater in World War II under General Joseph Stillwell. He served in post-war Germany with the 7th Army Medical Service. He was administrator of Valley Forge Army Hospital during the Korean Conflict and had served in Army hospitals from Walter Reed in Washington, DC, to Tripler General in Hawaii. He is survived by his wife and two daughters.

William Beisel, husband of Frances, PCOM's former librarian, died May 24.
