Dear Dr. Beal:

I consider it a privilege to accept your invitation to appear on the technique seminar presenting the "Manipulative Treatment of Heart Disease" at the A.O.A. convention in Dallas in July.

I shall follow your proposed agenda. It seems most thorough and I can think of nothing that I would wish to add or subtract to it.

I will take up to ten participants. I would like two view boxes in addition to the standard equipment you mentioned would be present. I shall provide three anatomy charts and x-rays myself.

I am most happy for this opportunity to present, in more practical detail, the spinal findings and treatment of same that seem so characteristically to be a part of heart disease and its thorough care.

Thank you kindly for this opportunity to present it at an A.O.A. convention.

Fraternally and cordially,

Richard S. Koch, D.O.

Dear Dr. Koch:

Dr. Neil Kitchen, the program chairman for the 1957, American Osteopathic Association Convention at Dallas, Texas has asked me to organize technique seminars similar to those which were held in New York City last year.

I should like to invite you to act as instructor for a technique seminar to be held on Wednesday afternoon July 17, 1957 from 2-5 P.M.

The number of participants in the seminar will be limited from 5 to 10 depending upon the wish of the instructor. Again the emphasis of the seminar will be upon informality and group participation. It is hoped that by limiting the number in attendance that there will be greater opportunity for individual expression. Thereby, it is hoped that the instructor will find the seminar as valuable an experience as the "students".

Individual rooms will be provided for each seminar. Each room will be equipped with a treating table, pillow, blackboard, chalk and eraser. Additional equipment will be provided if requested by the instructor.

I should like to select a title or theme for your seminar. May I suggest the topic Manipulative Treatment of Heart Disease. Please feel free to make other proposals for a title. I should like to have you prepare an outline or agenda for your own use to give direction to the discussion. I am enclosing a copy of the suggested outline which I prepared as a guide for the 1956 seminar. The technique seminars at the 1956 convention received considerable praise from both instructors and participants. I am sure that you will contribute to their success in Dallas.

I certainly hope that you will be able to accept this invitation. Please let me know how many participants you wish in your seminar from (5-10).

Fraternally yours,

Myron C. Beal, D.C.
Dear [Name],

I consider it a privilege to accept your invitation to offer a talk on the prevalence of the opportunistic infection of the AIDS patient in Dallas in July. I shall follow your proposed agenda, and I seem most through if I can think of nothing that I should add to it.

I will take up to 10 participants. I would like to view before in addition to the standard equipment you mentioned would be present. I shall provide 3 coronary catheterization of X-rays myself.

I am most hopeful for this opportunity to present in more practical detail the findings of treatment of some that seem to be a patient of heart disease of it, throughout.

Thank you kindly for this opportunity for presenting it as one of an AOA convention.

Best wishes,

[Name]
